**COLECRAFT**  
The Art of Detail™

## ***The Art of Detail***

Our design mission is to achieve success in both form and function. The Colecraft design teams' goal is to creatively solve the client's functional requirements without compromising form and style.

Attention to detail starts with listening and understanding the total requirements of the project. This includes scale, style functional and budget considerations.

Our broad range of core competency includes the ability to incorporate a wide range of material in to our designs. We select from the finest hard woods and veneers and include stone, glass steel, leather and many other materials appropriate for satisfactory execution of the design.

Alloy derives its meaning from a mixture or fusion of materials. Here, it also refers to a combination of shapes and spaces to utilize a sense of openness and invitation. This is the achievement Alloy.

Open, rectilinear elements of Alloy promote juxtaposing multiple materials and finishes for a refined aesthetic in a cohesive manner. Alloy is designed to be highly customizable and a catalyst to modern professional environments through this welcoming, attractive design.

Innovative use construction, materials, and ideas increase functionality, ease of use, while offering discreet privacy without being overtly obtrusive.

<b>Style</b>	Modern
<b>Case</b>	Grey Acacia veneer
<b>Counter</b>	Sandstone
<b>Worksurface</b>	Ebony veneer
<b>Structure</b>	Fully framed monolithic core
<b>Features</b>	Exo cable containment, integrated lighting, mixed material harmony
